BUSINESS & FINANCE

Vinlaks POS

Sell, keep stock right and see every till's takings, even when the internet is down.

Shown with sample data. Names and figures are invented.

OVERVIEW

A point of sale and back office in one, for shops, supermarkets, hardware stores, restaurants, bars and pharmacies. The tills keep selling when the internet drops and send everything as soon as it returns. Every sale takes its items out of stock, and a till will not sell what is not on the shelf. The owner sees each outlet's sales, shifts and reports from anywhere.

WHAT IT DOES

- Tills that keep working offline, on any computer or tablet browser
- Cash, M-Pesa (STK push), card, bank and loyalty points
- Stock that moves with every sale; deliveries, stock counts and moves between outlets
- Suppliers, purchase orders (LPOs) and expenses
- Tabs, tables and kitchen tickets for restaurants and bars
- Recipes: a dish uses up its ingredients
- Batches and expiry dates for pharmacies
- Wholesale prices, packs and weighed items
- Shifts, staff PINs and roles
- Receipts with a QR code to a copy online
- Daily reports and sales reports, with PDF copies

WHY IT WORKS

- Keeps selling without internet
- Never sells what is out of stock
- Several outlets on one account

MADE FOR

Shops, supermarkets, hardware stores, restaurants, bars, hotels and pharmacies.

PRICING

Priced by the number of outlets and tills; we set it up and train your staff.

Your server or hosted by us. Training and support included.
